

Shaheem Akhtar

Full-stack developer | Backend systems & infrastructure

Karachi, Pakistan (UTC+5) | Available for remote freelance projects

contact_shaheem@binaryfall.com | +92 300 2400479 | Discord: kingofwardens

PROFILE

Developer working across websites, backend applications, admin systems, Pterodactyl customisation, and server infrastructure. Development work includes BinaryFall's connected hosting platform and every addon for Addonate.

SELECTED DEVELOPMENT EXPERIENCE

BinaryFall | Full-stack & infrastructure developer

- Developed their website, backend, user management, and admin area.
- Implemented Pterodactyl customisation, website-to-panel integration, and provisioning automation.
- Built custom billing and supporting infrastructure, including Proxmox/KVM node work and resolution of a hairpin NAT connectivity fault.

Live website: binaryfall.com

Addonate | Developer of every addon

- Developed every addon for Addonate, including product interfaces and backend integration.
- Published examples cover coin-based billing, AI assistance, configuration editing, permissions, player management, and server status widgets.
- Config GUI Editor includes validated settings forms, change previews, revision history, and a raw-text fallback.

Selected public releases: PteroCoin (15 May 2026), NexusAI (2 June 2026), Config GUI Editor (19 August 2026). These are release milestones, not engagement start dates.

Product catalogue: builtbybit.com/creators/addonate.809930/

TECHNICAL SKILLS

Frontend: Next.js, JavaScript, HTML, CSS, responsive websites, customer and admin interfaces.

Backend: Node.js, Express, PostgreSQL, Redis, BullMQ, Prisma, billing and provisioning.

Infrastructure: Linux, Proxmox/KVM, Docker networking, Pterodactyl, Wings, Mailcow.

ADDITIONAL INTERFACE WORK

Four self-directed, multi-page frontend concepts: Nocturne (restaurant), Lumen Dental (clinic), Atelier (property), and Pulsegrid (SaaS). Includes filtering, appointment selection, galleries, and pricing interactions.
